

► Healthy animals mean safe and healthy food.

How We Treat Animals

We sometimes use antibiotics to **treat sick birds**.

We only give our birds **antibiotics when prescribed** by a veterinarian.

Our Commitment

- 2011** ○ We have **reduced the use of human antibiotics** in our broiler chicken flocks more than 80 percent since 2011. We process 2 billion broiler chickens annually.
- 2014** ○ We **eliminated the use of all antibiotics** at our 35 broiler chicken hatcheries in October 2014.
- 2017** ○ By September 2017, our goal is **zero human antibiotics used** in our broiler chicken flocks.

Our Practices

We use only FDA-approved animal health products including antibiotics.

When antibiotics are used, strict withdrawal periods must be followed before the animals are processed for food.

The USDA regularly tests chicken for antibiotic residues.

Options for Consumers

We offer consumers the option of **chicken and beef raised without antibiotics.**
