BEEF RECALL PROCEDURES

Tyson Fresh Meats has very strict recall and traceability procedures that are required to be tested semi-annually. Our procedures are as follows for traceability.

Each box contains a UCC/EAN Code as shown below. This code is electronically stored in our system and provides complete trace-forward (plant to customer) and trace-backward capability (customer to plant).

BEEF BAR CODE - UCC/EAN CODE 128

Tyson Fresh Meats policy requires that products must be traceable within two hours from the point of notification. This is dependent on:

- Product Code (e.g. D0351BH)
- Production Date
- Production Time

All plants are compliant and tested minimally semi-annually.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read 'D R Mallin'.
